SUPPLEX® fabric Brand Certification Requirements

NILIT® is a global leader in polyamide 6.6 production and we are focused on delivering high quality products and innovation to our customers around the world.
SUPPLEX® fabrics combine the look and feel of cotton but remain soft after repeat washing, do not shrink and are highly breathable. During wear, SUPPLEX® fabric keeps you cool and dry, the fabrics drying much faster than cotton.

SUPPLEX® yarns are air jet textured polyamide 6.6 and supplied only by approved licensees.
We have a wide range of innovative fibers under the SUPPLEX® fabric brand name, check out our website http://www.nilit.com/fibers/licensed brands or call one of the contacts detailed below on this page.

Using the SUPPLEX® fabric brand could not be easier, just follow the 3 easy steps: -
1. Fabric developed with SUPPLEX® fabric products should be submitted for testing using the form on the back of this document to our certification test laboratory.
2. We will confirm in writing the results of the certification testing, and if the fabric meets the Brand Certification Requirements detailed below, a unique reference number will be provided with the approval certificate.
3. The fabric mill can then identify their fabric samples as SUPPLEX® fabric and garment manufacturers can request hangtags by quoting the unique fabric approval reference number. Applications for hangtags by garment makers can be made directly on our Internet site : www.nilit.com/hangtags.

The following certification standards apply to all fabrics and garments that use the SUPPLEX® fabric brand. This permission must be requested for all new articles produced before the SUPPLEX® fabric brand is used:

SUPPLEX® Brand Qualifiers	Fabrics and garments must contain the required minimum content of a SUPPLEX® yarn manufactured by NILIT (see NILIT product list)
Minimum Qualifier Content (%)	The minimum content is 50% of an approved SUPPLEX® fabric product. The fabric/garment must contain a minimum of 90% polyamide.
Other Fibers	Natural fibers (eg cotton) are not permitted.
Garment Content Requirements	For cut and sew apparel, garments must contain a minimum of 50% of an approved SUPPLEX® fabric.

Innovative SUPPLEX® fabric Effects
Our innovative SUPPLEX® fabric range has been created to give designers the option to create cottony soft fabrics with different effects: -
100% **SUPPLEX® soft black** gives a permanent, wash-fast performance and when combined with a white yarn, creates a natural look, soft marl effect. If a slight lustre on the fabric is desired, **SUPPLEX® mercerised** look combines bright and dull yarns to give a subtle, soft sheen.
For exceptionally soft, cottony touches, **SUPPLEX® micro** gives high comfort levels in bodywear.
SUPPLEX® UPF
SUPPLEX® fabric garments can be identified as **SUPPLEX®** UPF fabric if they meet the certification requirement of greater than 40 UPF sun protection. NILIT supplies hangtags to support the **SUPPLEX®** UPF program (garment makers, brands and retailers can order hangtags on www.nilit.com/fibers/hangtags

Terms and Conditions
- Garment manufacturers are responsible for garment quality and for ensuring, along with the fabric producer, that the fabric is suitable for the intended end use.
- The written approval from Nilit to use the **SUPPLEX®** fabric brand on any specific certified fabric style is valid for 3 years. After this period, permission to use the brand would need to be requested again and new samples submitted for testing.
- NILIT may refuse the use of the **SUPPLEX®** fabric brand for low quality fabrics and garments.
- Hangtags, stickers and all other forms of **SUPPLEX®** fabric logo usage can be requested via our Internet site or from the contacts below. Details of the legal requirements of trademark usage are given on this Internet site. Unauthorized usage of the **SUPPLEX®** fabric trademark is subject to prosecution.
