

TACTEL® fabric Brand Certification Requirements

NILIT® is a global leader in polyamide 6.6 production and we are focused on delivering high quality products and innovation to our customers around the world.

TACTEL® fabrics combine the look and feel of cotton but remain soft after repeat washing, do not shrink and are highly breathable. During wear, TACTEL® fabric keeps you cool and dry, the fabrics drying much faster than cotton.

TACTEL® polyamide 6.6 yarns are supplied only by approved licensees.

We have a wide range of innovative fibers under the TACTEL® fabric brand name, check out our website http://www.nilit.com/fibers/licensed_brands or call one of the contacts detailed below on this page.

Using the TACTEL® fabric brand could not be easier, just follow the 3 easy steps: -

1. Fabric developed with TACTEL® fabric products should be submitted for testing using the form on the back of this document to our certification test laboratory.
2. We will confirm in writing the results of the certification testing, and if the fabric meets the Brand Certification Requirements detailed below, a unique reference number will be provided with the approval certificate.
3. The fabric mill can then identify their fabric samples as TACTEL® fabric and garment manufacturers can request hangtags by quoting the unique fabric approval reference number. Applications for hangtags by garment makers can be made directly on our Internet site : www.nilit.com/hangtags.

The following certification standards apply to all fabrics and garments that use the TACTEL® fabric brand. This permission must be requested for all new articles produced before the TACTEL® fabric brand is used:

TACTEL® Brand Qualifiers	Fabrics and garments must contain the required minimum content of a TACTEL® fiber manufactured by NILIT® (see NILIT product list)
Minimum Qualifier Content (%)	For circular knits, wovens and seamless, the minimum content is 35% For fine gauge hosiery/tights, the minimum content is 40% For Socks, the minimum content is 25%
Other Fibers	All other fiber types are permissible. Nylon yarns used in combination with TACTEL® products should be from Nilit whenever possible
Garment Content Requirements	For cut and sew apparel, garments must contain a minimum of 50% of an approved TACTEL® fiber fabric.

Terms and Conditions

- Garment manufacturers are responsible for garment quality and for ensuring, along with the fabric producer, that the fabric is suitable for the intended end use.
- The written approval from Nilit to use the **TACTEL®** fabric brand on any specific certified fabric style is valid for 3 years. After this period, permission to use the brand would need to be requested again and new samples submitted for testing.
- NILIT may refuse the use of the **TACTEL®** fabric brand for low quality fabrics and garments.
- Hangtags, stickers and all other forms of **TACTEL®** fabric logo usage can be requested via our Internet site or from the contacts below. Details of the legal requirements of trademark usage are given on this Internet site. Unauthorized usage of the **TACTEL®** fabric trademark is subject to prosecution.

Disclaimer

This Brand Requirement Certification document contains only selected data and further information on our Internet site should be carefully read. Customers using Nilit products are responsible for ensuring that it is suitable for the intended end use.
