

Sensil® Flow fiber Brand Certification Requirements

NILIT® is a global leader in Nylon 6.6 production and we are focused on delivering high quality products and innovation to our customers around the world. We have a wide range of innovative fibers under the Sensil® Flow fiber brand name. Check out our websites: www.nilit.com and www.sensil.com or call one of the contacts listed at the bottom of this page.

Using the Sensil® Flow fiber brand could not be easier, just follow the 3 easy steps:

1. Fabric or garments developed with Sensil® Flow fiber products should be submitted for testing using the form on the back of this document to our certification test laboratory.
2. We will confirm in writing the results of the certification testing, and if the fabric meets the Brand Certification Requirements detailed below, a unique reference number will be provided with the approval certificate.
3. The fabric mill can then identify their fabric samples as Sensil® Flow fiber and garment manufacturers can request hangtags by quoting the unique fabric approval reference number. Applications for hangtags by garment makers can be made directly on our Internet site <http://www.nilit.com/hangtags>.

The following certification standards apply to all fabrics and garments that use the Sensil® Flow fiber brand. This permission must be requested for all new articles produced before the Sensil® Flow fiber brand is used.

Sensil® Flow fiber Brand Qualifiers	Fabrics and garments must contain the required minimum content of a Sensil® Flow fiber manufactured by NILIT® (see NILIT product list)
Sensil® Flow fiber Minimum Qualifier Content (%)	For wovens fabrics, circular knits, seamless, hosiery/tights and socks the minimum content is 100% Nylon 6.6 Nilit yarns

Terms and Conditions

- Garment manufacturers are responsible for garment quality and for ensuring, along with the fabric producer, that the fabric is suitable for the intended end use.
- The written approval from NILIT® to use the Sensil® Flow fiber brand on any specific certified fabric style is valid for 3 years. After this period, permission to use the brand would need to be requested again and new samples submitted for testing.
- NILIT® may refuse the use of the Sensil® Flow fiber brand for low quality fabrics and garments.
- Hangtags, stickers and all other forms of Sensil® Flow fiber logo usage can be requested via our Internet site or from the contacts below. Details of the legal requirements of trademark usage are given on this Internet site. Unauthorized usage of the Sensil® Flow fiber trademark is subject to prosecution.

To take full advantage of the SENSIL Flow solution and maximize a circular economy in textiles:

- The whole garment should contain zippers, stitch lines, buttons, and other accessories in nylon 66, so it can be fully recyclable at the end of its lifetime. This will reduce waste and facilitate fiber-to-fiber recyclability.
- Educate consumers that when no longer wanted or in the end of life they will be able to return the garments to the stores or recyclers. Identification of the product will be important.
- This is an evolving program, for evergreen information or updates go to sensil.com

Disclaimer

This Brand Requirement Certification document contains only selected data and further information on our Internet site should be carefully read. Customers using Nilit products are responsible for ensuring that it is suitable for the intended end use. Full information via: www.nilit.com
